

JOSHUA JACOBY

SOFTWARE ENGINEER — COSTA MESA, CA

(818) 522-6182 — joshuadjacoby@gmail.com — [linkedin.com/in/joshuadjacoby](https://www.linkedin.com/in/joshuadjacoby) — github.com/joshuadjacoby

EDUCATION

B.S. SOFTWARE ENGINEERING : University of California, Irvine, 2013-2018

EXPERIENCE

DEVELOPMENT INTERN : grink Inc. (Encino, CA), July 2017 – Present

- Developing a mobile application for a fintech startup using ReactJS
- Responsible for implementing designs into screens for the app, focusing intently on User Experience using fundamentals of Interaction Design
- Collaborating with other team members to create new and innovative ideas to enhance the existing product

INSTRUCTOR : iD Tech Camps (Irvine, CA), June 2016 - August 2016

- Worked with up to eight students per class, teaching topics within STEM fields
 - Taught Mobile Game Design for iPhone and Android, using my own experience along with course curriculum to teach kids the importance of quality game design
 - By the end of each weeklong session, students were able to use the skills they learned to create their own project
-

PROJECTS

MOBILE GAME : Independent project, 2016

- Using Unity2D/C#, designed and programmed everything individually with the help of free-to-use sound and art from online
- Worked to create a control system that would be intuitive to use
 - Tested game with friends and colleagues to figure out which system was the best
- Received over 4000 downloads with an average of 5 stars on iOS and 4.9 on Android

WEB GAME : Multiplayer Game Project Course, 2016

- Created a two-player Snake game playable via two clients communicating with a server over a network
- Client written in JavaScript and HTML/CSS with server written in C++
- Used networking principles learned from class in order to implement artificial latency and mitigate it

UNITY3D GAME : Game Jam, 2015

- Developed a 3D maze game in Unity3D/C# over the course of 48 hours
- Worked as a programmer on a team of five developers
- Overcame challenge of balancing scope within a short time period in order to have a completed game at the end of the event

UNITY2D GAME : Autism App Jam, 2015

- Two-week project to create a game to assist children with Autism
 - Developed a face to emotion matching game to help kids learn to detect emotions from different facial expressions
 - Responsible for implementing and testing majority of game mechanics throughout the project
-

SKILLS

PROGRAMMING LANGUAGES : C/C++, Java, C#, Python, HTML/CSS, PHP, MYSQL

SOFTWARE : Unity, Unreal, Wwise, Visual Studio, Git, ReactJS
